Instructions

Welcome! We hope you enjoy creating your very own Arctic Fox finger puppet. On the front cover is a QR code to take you to the video instructions, however all the instructions you need are below.

You will need:

- Scissors
- Glue
- Decorating materials (can be felt tips, crayons, glitter, up to you!)

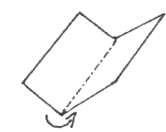

Step 1:

Cut out the main fox outline, and the smaller nose outline. *Careful scissors are sharp!*

Step 2:

Fold all of the dotted and dot dash lines following the key below.

Dotted Line
Mountain Fold
(neck & tail)

Dot Dash Line
Valley Fold
(legs)

Step 3:

Once everything has been folded, glue the A tabs behind the B tab to create a 3D shape. This can be a little fiddly!

Once you have the nose stuck together glue B to B following the shape on the face of the Fox.

Step 4:

Follow the fold and bend the legs round and slot them together.

Step 5:

DECORATE! Whoop! Have fun! You may want to un-fold or do this before some of the other steps.

SHARE YOUR CREATIONS ONLINE @HALFASTRING
WE WOULD LOVE TO SEE THEM!
